

I am a paying subscriber to satellite radio. I benefit greatly from the variety of information gained that I have not found elsewhere. I have listened to radio my entire 36 years and never have found such accessibility of unique information--especially the up-to-the-minute traffic and weather--offered by XM anywhere, at any time. I am appalled that this is even an issue: the NAB is attempting to dictate the format of the service for which I pay. Do I not live in the USA? Perhaps freedom is conditional according to the NAB.
